

HALO-921

Releasing Agent

2025/06/09 Draft. **PDS**

Description

HALO-921 can form a highly lubricating and high-gloss protective film after vulcanization, providing excellent lubrication and release effects. It is suitable for use in the release of rubber tire products, plastic products, polyurethane products, foam products, and plywood, among others.

Characteristics

- Increases appearance quality of the tires
- Green products for the environment
- Increases the life of air-bag by film
- Good anti-static ability
- Optimizes the curing processing

Properties

Appearance	Milky white liquid
Active ingredient(%)	30.0%
Ionic type	Anionic
Diluent	Water

Safety

This document does not contain the safety information required for the product. Please read the safety data sheet for this product before use.

Storage & packaging

When stored in its originally sealed packaging at 5°C - 40°C, this product may be stored for up to 8 months from its manufacturing date. Comply with the storage instructions marked on the packaging. Once past this expiration date, TAI COUNTY CHEMICAL no longer guarantees that the product meets the sales specifications. Product comes in 20 kg HDPE grey drums. (Breathable)

Applications

- Release agents used for molding rubber tires, rubber hoses, and rubber sheets
- Antistatic agents for rubber and plastics
- Furniture, leather, and wood/stone floor polishing wax
- Vehicle tire and interior plastic polishing wax
- Mold release, parting agents
- Mold release, anti-adhesive agents for rubber and plastic products

Processing

- Dilute with water to a ratio between 1/5 to 1/15 (depending on the field of industry)
- Mold is water washable after prolonged use of HALO-921

(Depending on the actual conditions, you can adjust the usage amount.)

The data provided above is to the best of our knowledge and experience and is without any warranty. Users should thoroughly test any application and independently conclude satisfactory performance before use.
