

# SRD-335

Temperature-Resistant Defoamer

2025/08/01 Draft. PDS

## Description

SRD-335 defoamer has special alkalinity resistance and temperature resistance. Even in weakly acidic or alkaline conditions, it still demonstrates good effectiveness and stability. Due to its excellent properties, it is widely used in applications such as wetting agents, dye cleaning agents, emulsifiers, and more. It is also suitable as an additive in distillation, esterification, and other chemical reaction processes.

## Characteristics

- SRD-335 maintains high resistance to alkalis and acids
- Critical Applications in which pH level is crucial
- SRD-335 low-viscosity emulsion that stable dispersions are easily attainable in high-viscosity formulations
- Accelerated performance
- Good temperature resistance
- SRD-335 soluble in water and can quickly suppress foams

## Properties

**Appearance** Milky white to yellowish liquid

**Active ingredient(%)** 35.0%

**pH(2%Solution,25℃)** 6.5±1.5

**Ionic type** Nonionic

**Diluent** Water

## Storage & packaging

When stored in its originally sealed packaging at 5°C - 40°C, this product may be stored for up to 8 months from its manufacturing date. Comply with the storage instructions marked on the packaging. Once past this expiration date, TAI COUNTY CHEMICAL no longer guarantees that the product meets the sales specifications. Product comes in 200 kg HDPE blue drums.

## Applications

- Textile Industry
- Agricultural Chemicals
- Petrochemical Industry
- Waste Water Treatment
- Foam free detergents/cleaner

## Processing

- Use in an amount of 0.1~0.3%  
(Depending on the actual conditions, you can adjust the usage amount.)

## Safety

This document does not contain the safety information required for the product. Please read the safety data sheet for this product before use.

The data provided above is to the best of our knowledge and experience and is without any warranty. Users should thoroughly test any application and independently conclude satisfactory performance before use.
