Hydroxyl Silicone Fluid

PDS

Description

Hydroxyl Silicone Fluid is a hydroxyl terminated polydimethylsiloxane polymer, HS series with different viscosities such as 1000, 5000, 10000, 20000, 50000, 100000 and 200000.

Storage & packaging

When stored in its originally sealed packaging at 5˚C - 40˚C, this product may be stored for up to 8 months from its manufacturing date. Comply with the storage instructions marked on the packaging. Once past this expiration date, TAI COUNTY CHEMICAL no longer guarantees that the product meets the sales specifications.
Product comes in 20、200 kg iron drums.

Characteristics

- Excellent thermal stability
- Good fire resistance
- Good dielectric properties
- Good antioxidant properties
- Good weather resistance

Applications

- HS series is a reactive linear bifunctional and hydroxyl end blocked silicone polymer. It is used to modify the physical properties and surface properties of various polymers.
- After reacting with the polymer formulation, it can improve the physical properties and surface properties of the polymer, such as improving surface slippage, anti-adhesion, surface scratch resistance, flexibility and hydrophobicity. Can be used in coatings, plastics, resins and other applications.
- Make the fabric smooth, soft and elastic. Also give fabric, paper, leather waterproof, water-and performance.
- Reacts with functional groups in the following polymers:
  -Epoxy
  -Ester
  -Carboxylic acid
  -Isohydrogenate

Properties

Appearance	Transparent
Active ingredient(%)	100.0%
Viscosity, 25℃, cps	1000~200000

Safety

This document does not contain the safety information required for the product. Please read the safety data sheet for this product before use.

The data provided above is to the best of our knowledge and experience and is without any warranty. Users should thoroughly test any application and independently conclude satisfactory performance before use.
